

**NOF METAL COATINGS  
EUROPE**

# European Training Center

Authorisation No: 22 60 025 15 60

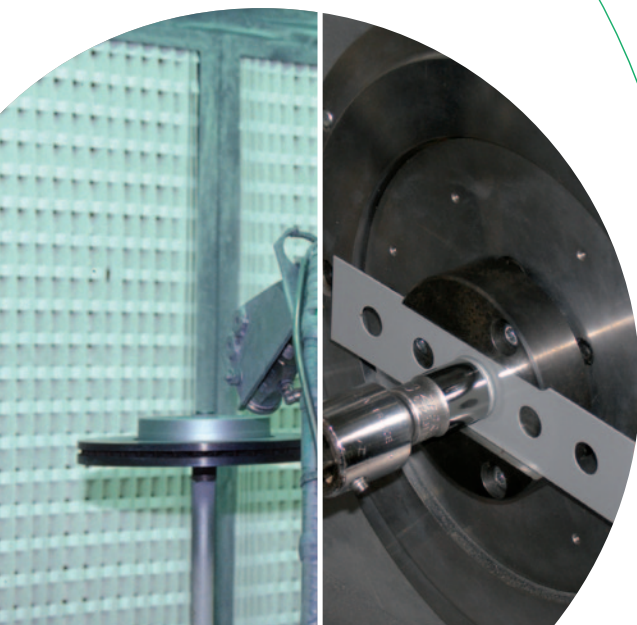

**Anticorrosion**

**Lamellar zinc**

**Coefficient of friction**

**Application processes**

**Quality controls**

# Our commitments

**Train** in anti-corrosion zinc flake technology

**Operate** in real conditions

**Meet** markets and clients requirements

**Discuss** with qualified and experienced trainers

**Improve** efficiency, quality and reliability

**Share  
our expertise**

## Specific modules

### Corrosion mechanisms

Factors leading to corrosion

Notions of electrochemical potentials

Protection of substrates against corrosion

### Protection with zinc flake technology

Protection principles

Application processes

Chemistry of compounds

## Tribology

Torque-tension  
measurement

Fastener tolerances

Principles, effects

## Quality control

Control of coated parts

Compliance criteria for  
parts

Identification of source  
of defects

## Tailor-made modules

According to your responsibilities, your business activities and your markets, we can propose tailor-made modules meeting your specific industrial needs.

## Practical information

<b>Duration and rates:</b>	1 to 3 days according to the modules, rates on request
<b>Industries:</b>	automotive and truck manufacturers, licensed applicators, fastener manufacturers and sectors such as wind industry or railway, distributors
<b>Trainers:</b>	technicians, engineers, doctors who have been working for NOF METAL COATINGS GROUP for many years
<b>Location:</b>	theoretical and practical training in our European R&D and training center at our Head Office, Creil (France) - 20 minutes from Paris-Roissy Charles de Gaulle airport
<b>Equipment:</b>	testing laboratories, rooms with salt spray cabinets, physical measurements, electrochemistry and tribology, pilot plant...
<b>Languages:</b>	French, English, German, Italian, Spanish
